AMBASSADOR MAT

According to the International Sanitary Supply Association, by having at least 16 linear feet of specialty flooring in your entrance, you can trap 75% of all dirt before it enters your store. Less dirt in your store means lower maintenance costs, a reduced likelihood of costly slips and falls, and improved overall appearance. Which is where Ambassador matting truly shines. As durable as it is attractive, Ambassador's rugged and ribbed surface pattern combined with a special blend of 70% polypropylene and 30% nylon construction makes it the perfect matting for commercial entrances, lobbies and any high-traffic, high-style areas.

AMBASSADOR MAT

MATERIAL

Needle-punched, 70% Polypropylene 30% Nylon

PROPERTIES
