CHANNEL TILE

Wherever there's water, there's an increased danger of slips and falls. So wherever it's wet, it's a great place for Channel Tiles. Indoors or out, Channel Tiles provide superior protection against slips and falls caused by wet floors by literally lifting foot traffic above the wet, slippery surface. Constructed out of 100% recycled PVC plastic, Channel Tile's open grid configuration generates maximum drainage and aeration and helps to retard the growth of infectious mold, mildew and bacteria. Channel Tile's modular design features interlocking tabs for fast, easy installation and can be trimmed to fit any shape or area. Channel Tile is also available with tufted carpet inserts - Channel Dry that aggressively removes debris from shoes as feet wipe across the mat. As durable as they are safe, Channel Tiles are resistant to oils, solvents, acids and many other chemicals. Added fungus inhibitors and UV stabilizers also make them mold and weather resistant.

CHANNEL TILE

MATERIAL

100% Recycled PVC plastic with added UV stabilizers and fungus inhibitors.

PROPERTIES

Slip-resistant cushion tiles transform wet surfaces into dry walkways that are safe, sanitary and easy to clean. Tiles are highly resistant to weather, oils, solvents, acids and other chemicals. Also available with Channel Dry tufted carpet inserts.

HEIGHT Available in 3/4" or 1/2"

SIZE AVAILABILITY Interlocking Tiles: 12" x 12" x 3/4"
Edge Ramps: 12" x 2.5" and 12" x 6"

WEIGHT 1.5 lbs./Sq. Ft.

INSTALLATION

Interlocking tabs allow tiles to be easily snapped together.
