COMFORT MAT

An industry breakthrough, Comfort Mat is one of the biggest things to happen to anti-fatigue flooring in years. Constructed for proper leg and back support, Comfort Mat actually induces natural flexing of the muscles to reduce the strain on feet, legs and lower back that causes fatigue and reduces productivity. But as easy as it is on your feet, Comfort Mat is very tough to wear out. Comfort mat has a wear-resistant surface with soft impact-absorbing foam backing. The quick recovery resilient foam backing provides one-half inch of comfort and protection. Available in either durable rubber or vinyl, Comfort Mat offers years of matting performance. Beveled edges help mat lay flat for added comfort and safety.

COMFORT MAT

MATERIAL

Rubber or vinyl with foam backing
