STICKS 'N STONES

Our Sticks 'n Stones will never hurt you. More importantly, it'll never allow your floors to be damaged by abrasive dirt and debris. One of our newest, most innovative designs, Sticks 'n Stones is not only fashionable, it's also highly effective in stripping away dirt and water – preventing abrasion and permanent damage to interior floors. Composed of 100% polypropylene, Sticks 'n Stones' denier fiber creates a more durable, higher-weight primary wear surface over a softer, more cushioned foundation. As pleasing to the eye as it is protective of your floors, Sticks 'n Stones features a dual weave construction. When used with our highly efficient TacFast® non-permanent fastening system, Sticks 'n Stones can be rotated for even longer life and greater performance.

STICKS 'N STONES

MATERIAL

100% polypropylene denier fibers in 300 oz. Ideally suited for entrance or wall-to-wall applications. This durable and attractive material is specifically designed for your high traffic areas. It scrapes away dirt and debris while keeping maintenance costs low and appearances up.

DENIER 300

BACKING Bitumen, TacFast®

FACE WEIGHT 65 oz

SIZES 19.5" x 19.5" Tiles

COLORS Charcoal

WARRANTY 5 Year Limited Warranty

MAINTENANCE

The Matworks recommends cleaning your flooring system on a regularly scheduled basis in order to maintain functionality and keep up appearances. The maintenance schedule should be initiated from the date of installation in order to achieve the maximum life expectancy of the product.

NOTE: Actual cleaning cycles will depend on store traffic and weather patterns and should be adjusted accordingly.

Daily: Vacuum with a rotary brush, preferably with an adjustable head.

Periodically: Clean carpet quarterly (or more often depending on traffic levels) using a high performance hot water extraction method. Wet/dry vacuums are recommended for areas with severe weather conditions.

Stain Treatment: Treat stain immediately by blotting with a clean dry cloth until no moisture is left on the soiled area. Spray the area with Cleaning Solution, then rub surface with a clean dry cloth. Vacuum carpet tiles after all stain treatments.

Gum Removal: Scrape excess gum with a knife or razor blade. Apply gum remover gel and scrape or brush the remaining residue. Follow stain treatment instructions to remove any remaining stain.

Meets the Us Flammability Standards

DOC FF1-70 and DOC FF2-70.
