TOTAL FLOOR PERFORMANCE FOR WELLNESS

MATWORKS
PROTECT EVERY STEP

Wellness and healthcare facilities face constant demands from heavy foot traffic, moisture, contaminants, and frequent cleaning. MatWorks delivers engineered floor performance systems and matting solutions that help reduce risk, control dirt and moisture, and create cleaner, safer, more welcoming environments for patients, visitors, and staff.

ENTRANCE SYSTEMS

Foot traffic brings in dirt and moisture. Entrance systems and walk-off matting helps stop it at the door. Choose from high-traffic, absorbent, slip-resistant, or branded options.

MatShield™ Pro

Premium tile grid systems capture dirt, moisture, salt, and debris from footwear and rolling traffic before they reach interior floors. Customizable sizing, easy maintenance, and smooth transition options help create cleaner, safer healthcare and wellness entrances.

REPP-Tile™

REPP-Tile by WaterHog® is a high-performance entryway carpet tile made from recycled PET for lasting durability, stain resistance, and fade resistance. Fully recyclable at the end of its lifecycle, it is designed to stay out of landfills while MatWorks handles installation, removal, and recycling.

WaterHog®

Trusted for decades in high-traffic environments, WaterHog mats help during all weather conditions. The bi-level surface traps dirt and moisture below foot level while reinforced rubber nubs resist crushing for long-term performance. Custom logo options are available to reinforce your brand from the moment customers enter.

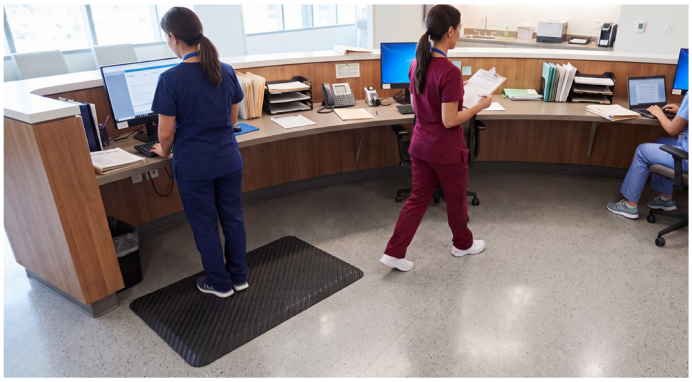

SAFETY AND COMFORT

From patient care areas and rehabilitation spaces to nurses stations and wellness clinics, healthcare floors demand more. Engineered safety and comfort solutions improve traction, reduce fatigue, and support cleaner, safer, more comfortable environments for patients, visitors, and staff.

Hog Heaven® Marble

The high-density nitrile-rubber blended cushion helps provide anti-fatigue comfort, high traction, and a smooth, easy-to-clean surface which is ideal for nurses' stations, pharmacies, labs, and other healthcare work areas.

TuffComfort® Mat

PVC free cushioning provides affordable anti fatigue comfort for healthcare staff who spend long hours standing. A high traction tread and beveled edges help reduce slips and trip hazards, supporting safer, more comfortable work areas.

Sure Stride®

Low profile antimicrobial matting helps manage moisture and reduce slip and trip risks in entrances, corridors, nurses' stations, treatment areas, restrooms, and other moisture prone healthcare spaces. Adhesive backing keeps it securely in place, while rapid liquid dissipation and a moisture barrier support faster drying and help protect hard surface floors.

CORE FLOORING

Flooring forms the foundation of the healthcare experience, shaping how a space looks, feels, and performs for patients, visitors, and staff every day. MatWorks flooring solutions are engineered for durability, cleanability, long-term performance, and design flexibility across demanding healthcare environments.

GeckoGrip

Innovative adhesive free backing uses microscopic suction cups to keep luxury vinyl tiles and planks securely in place under heavy foot traffic, wheel chairs, and gurneys. Quick installation, easy replacement, and versatile design options support attractive healthcare environments with minimal disruption.

Core Defender Series

Commercial grade vinyl flooring delivers lasting durability, dimensional stability, and advanced protection against scratches, stains, and scuffs. USA made reinforced construction and an easy to clean surface support reliable performance throughout demanding clinical and patient care spaces.
